

High security and reliability

Because your digital life is Key, Memup brings to you the Safe Key. Specially developed for your sensitive data, Safe Key offers a four-level protection including password data access, 256-bit AES hardware encryption, preventing any brute-force attack or unauthorized access. Featuring auto-lock protection and limited password attempts management (auto-erase), Safe Key actually builds a real Anti Crack wall and Data Guard Solution to all users looking for a safe storage solution.

Made in a strong iron design with a clever retractable connector for full physical security, the Safe key also offers an electronic protection with the patented U-Safe™ technology your data will even support small electronic shock such as hot unplug or electricity shut down!
